

## EAD Lab 08

The objective of this lab is to get understanding of:

- ASP.Net MVC
- Twitter Bootstrap

### Task

You have to make a basic **ASP.Net MVC** application containing a single view and controller. The view should be created using **Twitter Bootstrap** and it should look like the figure given below:

The screenshot shows a web form titled "Student's Details" with a dark header bar. The header bar contains the text "Start Bootstrap" on the left and navigation links "SERVICES", "PORTFOLIO", "ABOUT", "TEAM", and "CONTACT" on the right. The form fields include:

- Name:** Full Name (text input)
- Email:** Email (text input)
- Password:** Password (text input)
- Address:** Address (text input)
- Country:** (text input) with a red border and a red error message "You must enter a country"
- Region:** (text input)
- Year:** 2012 (dropdown menu)
- Notes:** (large text area)
- Sex:** Radio buttons for Male (selected) and Female
- ☐ Remember me
- 

At the bottom of the form, there is a yellow warning box with the text "Warning! Fix validation errors and try again". To the right of the form is the logo of Punjab University College of Information Technology (PUCIT), featuring a shield with a book and the motto "SERVE HUMANITY".

As soon as the user clicks on '**Create Account**' button, all the data entered in the provided fields should be stored in database using **LINQ to SQL**.

Following links will help you get started on ASP.Net MVC and bootstrap:
